

Freshmen to Vote Next Week In Class Presidential Election

The freshman run-off election between Bryan G. Tabler and William B. Parent will be held Wednesday, February 14, UGC election committee head Robert M. Stafford announced yesterday.

The election, which decides who will be class president, will be held in the Student Center between 7 and 10 p.m.. Each freshman may cast only one vote.

The tie resulted when both Tabler and Parent received 120 votes in the final class election balloting on December 19. The balloting was verified by six recounts at that time.

The remaining class officers elected at that time were George Khoury, secretary and James C. Pollock, treasurer. Khoury received 117 votes and Pollock got 114.

Parent in his speech before the December election attacked the inefficiency and inaction of the UGC. "If the UGC has done anything, I don't think any of us know about it." He said the UGC should be "the voice of the students."

Tabler proposed a program of increased communication between the UGC and the student body. This would include circulation of the minutes of the meetings to each room.

Stafford is hoping for a large turn out after the disappointing showing in December of only 450 voters.

Book Moving To New Wing Slated by Dix

By MELVIN M. MASUDA

The target date for moving into the John Foster Dulles Memorial Library is approaching, according to head librarian William S. Dix.

"We'll start moving in within the next two weeks," said Dix. "We're hoping to be done in time for the dedication ceremonies in May."

Former President Dwight D. Eisenhower and other noted officials will speak at the dedication.

The Dulles Library will house the papers of the late Secretary of State. The Firestone Library staff is now cataloguing the manuscripts which have been sent here from Washington and from Dulles' law office in New York.

Papers Plus Rare Books

"The whole section is not devoted to only diplomatic papers," Dix stressed. "The important thing is that it is merely a wing of the main library and not a completely separate building."

He noted that the diplomatic library will contain the entire Rare Book and Manuscript Department, formerly housed in Firestone.

He declined to estimate the value of the books that his staff will move into the section during the

Shelter Proposals Ready for Goheen

By B. PETER CARRY

President Goheen's special advisory committee on fall-out shelters has submitted a "preliminary report" to the President outlining possible sites and costs for shelters on campus and at Forrestral Research Center.

The committee has formulated a plan designed to provide shelter areas for 5050 persons on campus and at the graduate school. An additional 1000 persons could be sheltered at Forrestral.

No decision will be made on the report until President Goheen meets with the Board of Trustees late in March.

According to the proposal it would take approximately six months and \$120,000 to adapt existing structures at both sites for use as shelters.

Included in the list of proposed sites are Firestone Library, Wilcox Hall, the Graduate College and Palmer Laboratory.

Possible Extension

Should the proposal be accepted by the trustees and the conversion of the proposed sites work out to the satisfaction of the administration, the program could be extended to include the Chapel, McCosh Hall and 1938 Hall. These three sites would add space for an additional 2900 persons.

In a second phase of the shelter proposal, the committee recommends that the administration survey buildings to be constructed on the campus in the next few years for additional shelter sites.

Edgar M. Gemmell '34, chairman of the fall-out committee, explained that there is a possibility that several new buildings now in the design stage could be easily and inexpensively adapted to meet shelter requirements.

Minimum Protection

In choosing sites for fall-out shelters in existing buildings, the committee used shelter category C as their criteria. These shelters provide minimum radiation protection as defined by the Office of Civilian and Defense Mobilization.

In this type of shelter, survival without severe illness is excellent when only light radiation occurs, good with medium radiation and fair with heavy radiation.

Including shelters in soon to be
(Continued on page four)

Count Indicates Drop in U-Store Thefts; Worthington Lauds New Security Measures

A year's end inventory at the University Store has revealed that stock shortages have dropped drastically since last summer.

Store Manager F. Jack Worthington said yesterday that losses on the store's first floor due to theft and other factors since last June's comprehensive inventory amount to only \$8500 or .6 per cent of total sales.

This figure compares with 3.79 per cent for the year 1960-61.

According to Mr. Worthington

.6 per cent compares very favorably with that of "any store in the country."

The store manager attributed the improved record to good cooperation from students and the security measures instituted by the store.

The store first took measures to reduce theft last fall after learning that it had lost a total of \$135,305 in 1960-61.

Mr. Worthington estimated at the time that if these losses had not occurred students would have

received an additional 2 1/2 - 3 per cent in rebates.

Hire Police

During the rush to buy books last fall the store hired borough police to keep a close watch on the check-out counters.

Since then Mr. Worthington has kept personnel at both doors checking bags and reminding students to deposit books in the receptacles at the door.

In addition, mirrors have been installed throughout the store to aid personnel in detecting thefts.

Today

9 a.m.-5 p.m. — Sophomore Bicker registration at 201 Nassau Hall.

8 p.m. — Princetonian banquet at Nassau Inn.

8:30 p.m. — Classic Film. "Nosferatu," McCarter Theatre.

8:30 p.m. — Princeton University Concert; The Hungarian Quartet. Princeton High School Auditorium.

Orchestra Plans Concert Friday

The Princeton University Orchestra will present its second concert of the 1961-62 season at 8:30 p.m. Friday at Alexander Hall.

Directed by Nicholas Harsanyi, the orchestra will perform Mendelssohn's "Concerto in E Minor, Opus 64" for violin and orchestra, Debussy's "Danse Sacree et Danse Profane" for harp and strings and "Canzona."

The last number was written by Philip Batstone, a second-year graduate student in the Music Department.

Director Harsanyi has been a member of the faculty of the Music Department for the past nine years.

Simon, Moss Head '62 Triangle Club Staff; Seven Members May Tour Europe in June

John S. Simon '63 has been elected president of the Triangle Club for the coming year. Vice-president-elect is Jeffrey A. Moss '63 and William P. Hersey '63 was named secretary. John M. Rife '63 will be executive assistant for Triangle Junior.

Simon has been active in Triangle since his freshman year, serving in the orchestra and cast as well as writing. He was musical director for the latest Triangle production, "Tour de Farce." The new president is a member of Colonial Club and is majoring in music.

Moss joined Triangle his sophomore year and has worked in the writing and acting parts of the productions. He is majoring in English and comes from New York City.

Hersey, who will serve as secretary, is majoring in architecture and is a member of Key and Seal Club. He entered Triangle his sophomore year and has been involved in acting.

John Rife will be in charge of Triangle Junior, a select group of

seven Triangle cast members who give informal performances of numbers from past shows. Rife has been a cast member since his sophomore year and is a member of Colonial Club.

Simon said that plans are already under way for next year's production. The writing staff, headed by Simon and Moss, is working on a book show with a plot, rather than a revue like "Tour de Farce."

The Triangle Junior group plans to play for private parties, girls'

schools and also do a June show for alumni reunions. There is a possibility that the seven will tour Europe entertaining the Army.

"The Army, although offensively anxious to provide vacations for ROTC men, is not as wont to so accommodate the Triangle Club without a struggle," Simon said.

The business staff is working on the tour for next year while still receiving shipments of property and Triangle members left on this year's journey.

NEW REGIME: Triangle members have elected Jeffrey A. Moss, vice-president; John S. Simon, president and William P. Hersey, secretary.

A Re-evaluation

For the most part, this year's Bicker has already become an event of the past. And this is as it should be; indeed, to many undergraduates, the machinations of Bicker have been hashed over more than enough. But nevertheless, before this year's Bicker is completely forgotten, there seems a need to re-evaluate at least one of the changes that the ICC instituted this year.

One of the most frequently voiced complaints about this year's Bicker is that there was an undue amount of foul play between a number of clubs and an undue amount of hustling of sophomores, especially after bids were given out. In past years, the sophomores were allowed three days after they received bids to decide which club to join. Thus the decision progressed at a relatively leisurely rate. Indeed, many argued that the process was all too leisurely, and hence the period was shortened.

Because of the shortened period, however, a far greater amount of pressure was placed upon both the clubs and the sophomores. One result was that the sophomore Bicker parties held by each club became a great deal more important. The latter part of Bicker became more similar to the beer-guzzling type of rushing peculiar to a number of other universities. Instead of being allowed to make up his mind from talking with club members and classmates, this year's sophomore was hustled down to a section party that began at the strike of noon on Friday (if not earlier) and continued right up until 7:30 of Open House Night.

The shortened decision period brought yet other unwanted results. A number of clubs, worried about the success of their Bicker, felt it necessary to step up a campaign of slander upon other clubs. Raiding other clubs' parties became a frequently resorted to weapon, and sophomores walking down to the clubs on Open House Night had to run the gamut of a number of roaming squads of hustling club members.

It would be unrealistic to imply that such high pressure hustling has never existed in the past. But it is true that there was a far greater use of such unfortunate methods than in former years and it would seem that the shortened period for the sophomore to make up his mind was the main reason for this circumstance. Thus it would seem only fair to all concerned—and most especially the sophomore—that the ICC seriously consider returning the Bicker period to its original length. As it is, the sophomores know little enough about the clubs, and it seems only reasonable to allow them ample time to make an important decision that will affect two years of their Princeton career.

Letters Solicited

The Daily Princetonian welcomes letters of a moderate length on issues of current campus, local, or national issues. All such correspondence should be signed, although the name will be withheld if desired. Because of space limitations, of course, all letters received cannot be published, and we reserve the right to edit them for the same reason.

Editor at Large

By Allen D. Black
News Editor

Princeton's decision to retain three of the world's most renowned architects to design new buildings for the campus is indeed encouraging, for it indicates a clear break from the timid policy of previous years.

The choice was understandably a difficult one to make; and it is easy to sympathize with the administration's hesitance to abandon the middle of the road for a more definite stand.

The pressures of the \$53 Million Campaign were undoubtedly strong, for instance; and, of course, the university had to guard against the danger of sponsoring another Alexander Hall. Or the other hand, there were the pressures of students, faculty, and outside architects to go all the way and put up spectacular but often controversial buildings which might not have fit in with the rest of the campus.

Caught between the jaws of this vice, the administration up until now took no stand at all. It did not renounce the development of modern materials and demand a continuation of the antiquated neo-Gothic style, but at the same time it did not hire architects who would use these new materials with freedom and imagination. This is what dis-

turbed everyone.

Now Princeton has made a choice. Edward Barnes, Hugh Stubbins and Minouri Yamasaki are architects who are arousing much excitement in the profession today and will, I feel sure, add much to the architectural stature of the university. They will provide Princeton with examples of what the university's critics have called "the best architecture of our times."

Granted that it is unfortunate that so many buildings were constructed during the period of mediocrity . . . the period of indecision. The price that was paid was for buildings that by no stretch of the imagination can be called great. They are obviously representative of a tradition of conformity. Unfortunately, this is the only tradition possible when the client himself cannot make up his own mind.

However it is useless to waste energy criticizing what has already been built. The Engineering Quadrangle and the new dormitories will be here for another fifty or a hundred years; and the best policy is probably to plant ivy, to stop talking about our mistakes, and to be thankful that Princeton has finally made a decision.

Socialist Preamble

Earlier this year students in Professor Goldman's History 307 prepared both a conservative and a liberal preamble. Not to be slighted, the Socialist Club has similarly supplied posterity.

Something is wrong in America: we call ourselves the richest nation on earth, but what does this mean when 24% of all privately held wealth and 76% of all personally held securities are in the hands of one per cent of the population? We call ourselves the land of equality and opportunity, yet the average white wage earner can make only \$3400 a year, and his colored co-worker must get by on scarcely more than half that—\$1800; we call ourselves a nation on the move, yet 6% of our labor force is forced to move only onto the unemployment rolls. Something is wrong in America when the president of the American Economic Association, Paul Samuelson, estimates that one person in six cannot earn the \$2500 necessary for "bare subsistence" and one in three cannot earn the \$3600 for "minimum health and decency," that is, some medical care, a movie once a month, and meat for dinner now and then.

No "invisible hand" will rescue our economy from this dilemma. Our system, with the highest living standards in the world, is more than unjust; it is unable to provide for its own. Millions are spent on fallout shelters, yet who knows how many millions lack shelter of any kind? Something is wrong, and we as Socialists believe that only men working together can bring sanity to a nation and a world

preparing for a war that nobody wants, a nation and a world run by a military, economic, and political elite mainly responsible only to itself.

We, as Socialists, reject an economy run for money and not for men. We believe that the worker and the consumer, through their democratic government, should take direction of the economic institutions which shape and control their destiny. The welfare of man, which is the problem of all history, must no longer be served by a self-perpetuating elite struggling to control an obsolete system; economic planning, responsible in both ends and means to all the citizens of the nation, is essential to the effective functioning of our economy.

We, as Socialists, propose a program for America in which the people collectively control the conditions under which they live. We propose a nation in which all institutions—military, economic, and social—are responsible to the people as a whole, and not to a small aristocracy of wealth and privilege. We propose a world ruled by a majority, within the bounds of established rights for all. We believe that men, through democratic governments, can and must act together to create a new socio-economic order. Under capitalism, this is an idle dream; under Socialism, this is the framework of a practical program for our times. We, as Socialists, extend to all men an invitation to join us, that together we can make our lives count toward the building of a better world.

PRINCETON SOCIALIST CLUB

In the Mail:

To the Daily Princetonian:

Having been here roughly five months now, I have found it rather easy to work up a great deal of anti-Yale spirit. Therefore it gave me great pleasure to observe the following situation at the basketball game last Saturday night.

A group of rather obnoxiously enthusiastic Yale fans, led by a

middle-aged "grand-dame," was seated behind us and had made life most unpleasant for most of the game. Following one of the outlawed "Hate, Yale" yells, the lady remarked, "You know, you're the only people in the Ivy League who do that to us." Thoroughly disgusted, the fellow beside me turned to her, looked her straight in the eye, and with

tranquility and serenity marvelous to behold, he replied, "Madam, we are the only people in the Ivy League." Silence reigned among the Yalies.

More power to people like that and let's not see the recently recently revived anti-Yale spirit die!

An enthused frosh
(Name withheld by request)

New President Elected

Hill, Crawford to Lead Intime

INTIME ELECTS: New officers are: vice-president George Blanchard '64, president Colin P. Hill '63 and secretary David W. Cain '63; back row, business manager J. Slater Crawford '64, public relations director Carl R. Ernst '63 and technical director Allan B. McClain '63.

Colin P. Hill '63 has been named the new president of Theatre Intime. The vice-president will be George Blanchard '64 and heading up the business staff will be Jo Slater Crawford '64.

The new secretary is David W. Cain '63. Technical director is Allan B. McClain '63, and Carl R. Ernst '63 will be public relations director.

Hill has been active in Intime since his freshman year and played the aunt in the group's latest production, "Charley's Aunt," in November. He is a member of Ivy Club and is majoring in history.

The new vice president, George Blanchard, has served Intime for three years mainly as technical supervisor and lighting design. He lives in Foston and is a member of Cloister Club.

Crawford, the business manager, has been in several Intime plays as well as being stage manager for "Jew of Malta" and "La Ronde." He is a member of Key and Seal and is majoring in English.

The secretary, David Cain, has held parts in many plays, including "Charley's Aunt" and is currently in "Henry IV." He is bridging religion and literature.

Six Faculty Members Given Grants by Sloan Foundation

The Alfred P. Sloan Foundation has awarded six members of the Princeton faculty two-year unrestricted grants for research in the areas of chemistry, mathematics, physics and related fields.

The recipients: Richard Blankenbeler, assistant professor of physics, graduate of Miami University of Ohio (A.B.) and Stanford (Ph.D.) and a member of the Princeton faculty since 1959.

James W. Cronin, assistant professor of physics, graduate of Southern Methodist (A.B.) and University of Chicago (M.S. and Ph.D.), former physicist at Brookhaven National Laboratory and a member of the Princeton faculty since 1958.

Edward C. Nelson, associate professor of mathematics, graduate of University of Chicago (M.S. and Ph.D.), former member of the In-

stitute for Advanced Study (1956-59) and a member of the Princeton faculty since 1959.

O. Timothy O'Meara, assistant professor of mathematics, graduate of the University of Cape Town, South Africa (B. Sc. and M. Sc.) and Princeton (Ph. D.), former member of the Institute for Advanced Study (1957-58) and a member of the Princeton faculty since 1958.

Paul von Rague Schleyer, assistant professor of chemistry, graduate of Princeton (A.B. and Harvard (M.A. and Ph.D.) and a faculty member since 1954.

John R. Stallings, assistant professor of mathematics, graduate of University of Arkansas (A.B.) and Princeton (Ph.D.).

Calendar for UGC Includes Election, 11 O'Clock Change

By DAVID B. MacNEIL V

The Undergraduate Council has a number of important projects and issues on its slate for the current semester.

One of the most pressing problems now facing the Council is the organization of the final election of freshman class officers. The details for this procedure will be announced shortly.

Members of the UGC met with the Trustee Committee on Undergraduate Life during the reading period with the result that a special meeting of the latter group will be held soon to reconsider proposals for modifying the present 11:00 rule.

The crucial proposal favors an

extension of the Saturday night time limit for women in the dorms from 11:00 to midnight.

Joseph R. Lundy '62, chairman of the UGC, recently cited several other proposals, which are currently under consideration by the council.

These proposals aim at improving the frequently criticized lack of communication between the Council and the undergraduate body. Some of the proposals now pending are:

- The establishment of a letter or newsletter which would be circulated on the campus and would report on the activities of the Council.

- The extension of personal invitations to arbitrarily selected undergraduates so that a cross section of the campus would be kept in close contact with Council. This proposal would also furnish the UGC with the opinions and ideas of non-affiliated undergraduates.

- Improved publicity and facilities for open meetings. The meetings are open now but undergraduate

Princeton YAF Group to Send Delegates to New York Rally

The newly chartered Princeton chapter of the Young Americans for Freedom has organized its plans for participating in the YAF rally to be held March 7 in Madison Square Garden.

Princeton's chapter is offering tickets at \$1 and \$3 for the rally and charter bus service for the round trip to New York at \$1.70. The tickets for the rally and bus service are on sale at the Student Center today through Friday from 8 a.m.-1:15 p.m. and 9 p.m.-midnight.

The YAF, an organization for young conservatives, plans to have Senators Barry Goldwater (R. Ariz.) and John Tower (R.-Tex.) speak at the rally.

The purpose of the gathering is not only to bring together the various YAF chapters which have

been organized but also to enable the members to meet some noted conservative spokesmen.

At the rally, the YAF plans to present awards to John Dos Passos and Moise Tshombe.

Community Fund Plans Song Fest

Members of the Triangle Club and the Nassoons will participate in a song festival to be held Wednesday and Thursday at McCarter Theatre.

Sponsored by the United Fund, the event will start at 8:15 p.m. on both nights.

Other groups in the festival include the Columbus Boy Choir, Princeton High School Choir, Westminster College Choir and Palmer Squares.

Shelter Proposal

(Continued from page one)

constructed buildings would afford better protection in A and B classification shelters.

The estimated conversion costs include provisions for necessary ventilation, sanitation, water supplies and shielding against radiation.

Additional Expenditures

An additional sum of about \$37,000 will be required for communications equipment, medical supplies, radiation monitoring equipment and tools.

Approximately \$24,000 will also be needed, at a set rate of four dollars per person, to feed the 6050 in the shelters for a two week period.

In a letter attached to the report, Mr. Gemmell outlined the purpose and the assumptions under which the proposal was formulated. As President Goheen originally

asked when he appointed the fall-out committee in September, the committee limited its research to the establishment of shelters without dealing with the "moral, ethical, psychological and political" implications of the question.

Four Basic Assumptions

The committee worked on four basic assumptions which took into account basic moral issues which Mr. Gemmell said "are all so inextricably intertwined" in the problem of physical protection that they cannot be avoided.

● "Since protection from direct hits, blasts or firestorm is not feasible at a reasonable cost, attention can be given only to the provision of protection from radio-active fall-out.

● "Given the first assumption, planning can then proceed on the basis of one hour's notice to take cover.

● "The period of protection should extend for a period of two weeks.

● "No one should be denied admission to a shelter, up to the capacity of the shelter itself."

Despite the fact that no decision has been approached and no appropriations have been made, President Goheen has held a faculty meeting and an informal faculty smoker to discuss the shelter's proposal.

Mr. Gemmell feels the faculty is about evenly divided on the shelter question.

In his letter Mr. Gemmell also outlined numerous questions of ethical, moral and political nature which the committee feels must be considered before a final decision can be made.

UGC

(Continued from page three)

ate attendance has been poor because of these inadequacies.

Book Exchange

Lundy also mentioned a proposed book exchange which, if instituted, would "offset the tremendous prices at the U-Store."

"I think a lot of money could be saved by such a project," Lundy commented.

The Council will meet in the near future to review proposed alterations in the organization's constitution. One such proposal favors the election of the Council's officers by the entire undergraduate body instead of by the current method, which limits voting privileges to council members.

perpetual motion?

No! But scientists and engineers at Ford's research and scientific labs do deal in perpetual notions—and they have more than a few about what might, be commonplace in the future, some of them just as startling.

Studies at Ford involving new energy sources and improved materials may help bring jet-propelled cars with gyro stabilizers... automatic driving controls... flying automobiles and wheel-less vehicles that glide on a cushion of air... vehicles propelled by atomic energy... plastics with the strength of conventional metals... adhesives that replace welding... radar and other electronic controls to assist or replace the driver in many situations.

Basic studies in these and other fields are just part of a continuing program of progress aimed at reinforcing Ford's leadership through scientific research and engineering.

FEBRUARY 10 ISSUE NOW ON SALE

Library

(Continued from page one)

next three months.

The lower level of the wing will be devoted to vaults for the rare volumes, while the upper level will have research rooms and offices.

The only entrance to the new section is to be located on the first floor of Firestone and controlled by an electronic device.

A centrally located office will allow a supervisor to oversee the three research rooms and the main reading room.

"This will help prevent anyone from stuffing his briefcase with papers," said Dix.

He said that the construction of the Dulles Library "is only one of the many pending changes in the library system."

Coming Projects

Among the forthcoming projects he noted were the reading rooms in the proposed architecture building and the addition to the Woodrow Wilson School.

As a result of the \$53 Million Campaign, the art library will be expanded, Dix said.

In addition, the Engineering Quadrangle will include a library five times as large as the present engineering library in the Green Building.

Dix said that the Julian Street Library at Wilcox Hall will soon house 10,000 volumes instead of the present 5000. Many of the books there will be duplicates of the volumes in Firestone Library.

A. A. C. Requests Books for Africa

The African Affairs Committee is sponsoring a book drive for the library of the University of Lagos in Nigeria through February 17.

"Because of the expense of shipping books, the books must be of high quality, suitable for a university library," chairman of the drive, David H. Hunter '64, stated.

Books should be brought to the Committee's office in the basement of Whig Hall any day between 2 and 6 p.m.

The university, which opens this fall, will accept any type of book, including textbooks.

Student Peace Union Bursts Into National Political Scene

Telegrams and topical discussions will highlight a forthcoming burst of activity by the Princeton Student Peace Union.

Participating in a nation-wide "send-a-telegram-to-Kennedy" campaign this weekend, the Union will attempt to deter the President's decision to resume nuclear tests in the atmosphere.

Close to 10,000 telegrams are expected to flood the White House. Princeton SPU Chairman R. Hunter Morey '62 predicts that 50 campus telegrams will be the offing.

Discussions, Too

In response to the Princeton Friends of Katanga movement, begun during the recent Congo crisis, the Student Peace Union has also scheduled a public panel discussion titled "The United Nations and the Congo."

Planned for February 13, at Whig Hall, the participants will include Professor Alex Kwapong from the Classics department, on leave from Ghana University; Lawrence Ekpebu, a graduate student in the Politics Department; Willie Musarurwa, Parvin Fellow from Southern Rhodesia and Jean Luvwezo '63, a Congolese student

in the Woodrow Wilson School.

The Union has officially invited the Friends of Katanga, as well as the Conservative Club, the Socialist Club, the Young Americans for Freedom and other Princeton political groups.

Questions Accepted

Questions will be accepted from the floor, in written form only.

The program is intended, according to Morey, to bolster the United Nations and particularly American support of the United Nations.

In addition to the Congo issue, which the Union views with some reservations, the debate will deal with the U.N. bond issue.

Finally, on February 16 and 17, six members of the eight man Princeton Union will journey to Washington to picket the White House on the nuclear testing issue. They are expected to be joined by 5,000 other students.

Morey cites the increased popularity of the Princeton Union, noting that its membership has doubled to eight since Christmas vacation.

A message from the Treasury of a free people

How to invest in freedom on the installment plan

You can't buy freedom. For cash or installments or any other way. It's not for sale.

You can make a sound investment in freedom, though, by investing in U.S. Savings Bonds. Just \$4.33 a week on payroll savings where you work will buy a \$25.00 Bond each month.

As your savings grow, built up by 3 3/4% interest, you get closer to financial freedom—a desirable state for each of us if America is to be financially strong.

At the same time, your dollars go to work for another kind of freedom . . . the kind you'll find fully described in a document conceived nearly two centuries ago at Independence Hall.

Start buying Bonds where you work now. When you do, you'll be joining 8 million Americans who have signed up for a regular share of freedom each month.

ADAMS HOUSE DRAMA SOCIETY,
Harvard University,
announces that its fall production of T. S. Eliot's
MURDER in the CATHEDRAL
is going on tour,
to Princeton
the production will be sponsored by the
Chapel Deacons
and will play at

Twice - Successful Rifle Team To Oppose Navy, Columbia

Princeton's rifle team, undefeated after two matches, will fire against Army and Rhode Island University in a triangular meet Thursday, and again against Columbia on Saturday.

The team opened its season January 11 by upsetting favored M.I.T., 1413-1402, in a postal match. Two Saturdays later they outshot Tulane, 1409-1392.

High man in both matches was senior Jack Marburger. In the match against M.I.T., which was favored by 20 points in the pre-

season ratings, Marburger fired 99-97-93 for a total of 289. This was just two points below the university record.

Pete Plaut, Leo Vroombout, Wolf Putschler and the team captain Bruce Florstein also fired in the matches.

In the Tech match Plaut, Vroombout and Putschler all scored 282 with Florstein two points behind at 280.

The exceptional scores turned in by Pete Plaut as well as Marburger enabled the team to down M.I.T.

Ivy All-Star Forward Bolsters Brown's Slim Basketball Hopes

Because of Brown's mediocre 3-10 record, the performance of All-Ivy forward Mike Cingiser is often overlooked.

Like the Tigers' Pete Campbell, Cingiser could well become one of the few players to make the Ivy All-Star team three straight years.

With a total of 1081 points so far in his college career, Cingiser now stands third among all-time Brown basketball players. He will most likely move into second place,

but will need to average 20 points a game for the remainder of the season to surpass all-time leader, Joe Tebo.

In three years of college ball, Mike has scored over 20 points in 18 games and has been held to less than 10 only six times.

Tallies 16 Against Tigers

In the recent weekend road trip, Mike tallied 16 points against the Tigers and added 21 more against Penn.

The fact that Mike could play for any team in the country has been attested to by such coaches as Duddy Moore of LaSalle, Joe Mullaney of Providence and several other coaches who have seen Cingiser in action.

In discussing his outstanding 6-4 forward, Brown coach Stan Ward commented, "Mike is well above average in the four basic skills—shooting, passing, rebounding and defense—as well as the intangibles—teamwork, hustle and attitude.

"His individual accomplishments would have been much greater had he been playing with a stronger, better-balanced team. Opponents have packed their defense heavily to stop him."

Assists, Rebounds Leader

In addition to his scoring talents, Cingiser has been the team leader in assists and the second leading rebounder all three years on the varsity.

Despite his skills on the court, Mike is not overly enthusiastic about playing professional basketball. With a 2.5 average as an English major, he prefers a teaching-coaching career.

After leading West Hempstead High School to the Nassau County, New York, championship in his junior year, Cingiser received bids from several colleges in the East, before choosing Brown.

"I picked Brown after having made a visit to the campus. I just knew I'd like it here and I have," commented Cingiser.

Soon to receive his Ph.D., partially through an IBM education program, Harold Mechanic (B.S. in Mathematics, CCNY '53, M.A., Columbia '55) constructed ingenious mathematical models of advanced IBM data processing systems.

a mathematician works in the mainstream at IBM

Advanced data processing systems—whether designed for business, industry, science, or government—have been made possible in large part by the talents and abilities of the mathematician.

Harold Mechanic, for instance, is working in areas of system simulation, interesting work in building mathematical models to study as an example the performance of proposed Tele-Processing* systems. After transforming the models into computer language, numerous possible system configurations were fed into a giant computer to determine an optimum arrangement of components. Thus, like many mathematicians at IBM, Harold Mechanic is able to use the computer as a tool to advance both theory and technique of systems analysis.

If you are receiving your degree in mathematics, you

*Trademark

might do well to investigate the unusual opportunities at IBM. Working alone, or as a member of a small team, you will find many chances to make important contributions to your field. You will also be eligible for excellent education programs.

Positions will be open in mathematics research, computer programming, and applied mathematics. All qualified applicants will be considered for employment without regard to race, creed, color or national origin. The IBM representative will be interviewing on your campus. He will be glad to give you further information. Your placement office can make an appointment. Or you may write, outlining your background and interests, to: **Manager of Technical Employment, IBM Corporation, Dept. 888, 590 Madison Avenue, New York 22, N.Y.**

You naturally have
a better chance to grow
with a growth company.

IBM

IBM will interview March 13, 14.

WOULD YOU VOTE FOR A
MAN WHO DIDN'T BELIEVE IN

GOD

Religion shouldn't be a political issue, says Richard Nixon — unless a candidate "has no religious belief." In this week's Post, Robert Bendiner challenges this attitude. In "The Voice of Dissent," he claims that agnostics can be more moral than churchgoers. And points out that some of our greatest patriots didn't believe in God.

Frosh Wrestlers Topple Penn

Building up a 26-3 lead through the first seven matches, the freshman wrestling team held on to defeat the Penn yearlings, 26-13.

In winning their third match in five outings, the frosh combined

four pins with two decisions to register their second Ivy League victory.

Olson Wins

Rick Olson gave the Tigers a short-lived 3-0 lead with a win in the 123-lb. class. After Sam Pierson dropped a 4-2 decision, the frosh took the next five matches, four of them with pins.

Bruce Buck (137-lb.), Dan Fisher (147-lb.), Bill Havener (167-lb.) and Rick Armentrout (177-lb.) registered falls, while Thor Solberg won a close 2-1 decision.

With the Bengals up by 23, the Red and Blue took the 191-lb. and open classes with pins.

In addition to Penn, the freshmen also defeated Columbia and Lawrenceville. Their two defeats have come at the hands of Franklin and Marshall and Lehigh.

ATHLETIC NOTICES

FRESHMEN—Baseball managers needed for varsity and freshman baseball. Please contact Ed Walsh, WA 4-2603.

Crew Tank

(Continued from page eight)

In these tanks, eight men can row in a line at the same time, and the circulating water more accurately simulates actual rowing conditions.

All of Princeton's major competitors have had these tanks for years, Schoch explained.

Princeton had plans for a 10-man rowing tank and a new building, but the \$53 million drive directed the money into other channels, he added.

Schoch still has hopes for the future, however. The home-made tank is only a "temporary stop-gap, until we get the real thing."

It's what's up front that counts

FILTER-BLEND is yours in Winston and only Winston. Up front you get rich golden tobaccos specially selected and specially processed for filter smoking. Smoke Winston.

WINSTON TASTES GOOD like a cigarette should!

Freshman Sextet Upsets Ithacan Yearlings, 8-3

Princeton's freshman hockey team polished off a weak Cornell squad, 8-3, Saturday afternoon at Ithaca. The win brings their record to 6-1 for the season.

Although it was an easy victory for the Tigers, there were some moments of doubt during the first period. The Bengals started fast, with George Hall taking a pass from Stony Stollenwerck to slap in the first goal at 2:59.

The Big Red came back strong. Their left defense, Jim Mabley, stole the puck and broke loose to score all alone at 9:09. Then 5 minutes later, the Ithacans worked in their second tally to take the lead.

Tiger Comeback

The Tigers quickly regained control, however, with Jim Crane's goal at 16:49 tying the game, and with Hall's second score putting them back in the lead just before the end of the period.

George Crozier and Dave Gamble lengthened the Bengals' lead with a goal apiece in the second period and George Peterson, Mike Sanger and Chris Gillespie added three more tallies in the final period.

Cornell's Steve Teryazos got through the Tigers' third team for the final score of the game.

George Hall has been the top scorer for the frosh with 12 goals and 10 assists. Dave Gamble has been exceptionally tough on defense.

After winning their first 5 games by lopsided margins, the frosh

dropped a disappointment to Army last week. The coming weekend they meet two strong high school teams, West Haven and Hamden.

According to Coach Peter Cook, those games will indicate the Tigers' true strength and ability to score.

The big games yet to come include contests against Harvard, Yale and Dartmouth.

Statistics

PRINCETON (8)—Goal: Reese; defense: Jones, Gamble; center: Stollenwerck; wings: Hall, Crozier. Alternates: Peterson, Crane, Clarke, Abernathy, Marsden, Gabbe, Madeira, Sanger, Gillespie, Livingston.

CORNELL (3)—Goal: Sharpe; defense: McCabe, Warde; center: Teryazos; wings: Adams, Delius. Alternates: Averill, Carpenter, Kirkland, Kooms, Mabley, Terves, Velie, Sullivan.

FIRST PERIOD—1. Princeton, Hall (Stollenwerck) 2:59. 2. Cornell, Mabley 9:09. 3. Cornell, Averill (Kirkland, McCabe) 13:06. 4. Princeton, Crane (Gamble, Peterson) 16:49. 5. Princeton, Hall (Crozier, Stollenwerck) 18:06. Penalties: Hall, 0:38; Gamble, 12:09. Saves: Reese 1; Sharp 14.

SECOND PERIOD—6. Princeton, Crozier (Stollenwerck, Hall) 9:20. 7. Gamble 10:22. Penalties: Adams, 1:01; Peterson, 5:19; Gamble, 7:00; Ward, 7:15; Peterson, 15:18. Saves: Reese 4; Sharp 9.

THIRD PERIOD—8. Princeton, Peterson (Abernathy, Crane) 3:02. 9. Princeton, Sanger (Jones) 3:59. 10. Princeton, Gillespie (Sanger, Madiera) 10:26. 11. Cornell, Teryazos (Delius) 14:38. Penalties: Adams, 6:01; Stollenwerck, 12:17; Crozier, 19:13; Teryazos, 19:13; Jones, 19:14. Saves: Reese 1; Sharpe 6.

Defeat of Big Red Creates Turmoil in Ivy Standings

By MARTIN E. ROBINS

Dartmouth's shocking 60-58 upset of Cornell on Saturday night has thrown the Ivy League race into a scramble.

Princeton's title chances are now not quite as dim as they appeared following the Tigers' 80-78 overtime defeat by Yale. Princeton stands two games, instead of three, behind the leaders, due to the Big Red's loss.

Cornell had been serenely rolling along atop the loop with a 5-0 mark until ambushed at Hanover.

Yale's 71-59 loss to Penn at the Palestra the evening before had enabled Cornell to climb into the lead. Now the Big Red and the Elis share first with 5-1 records.

Penn stands second in the race at 4-2, while Princeton, Harvard and Dartmouth are knotted at 3-3.

Campbell Paces Scoring

In the league scoring race Pete Campbell, with a weekend output of 54 points, assumed the leadership. He has collected 124 points in league play for an average of 20.7 ppg.

In the overtime Yale contest Campbell flipped in 30 points for his single game high this year.

Al Kaemmerlen, Princeton's 6-6 center, leads the loop in total rebounds with 61 in six games.

Campbell's margin, however, is very slim. Art Wolinsky, Columbia's jump-shooting star, has con-

nected for 120 points. The 5-10 soph has provided the bulk of the scoring for the lowly Lions this season.

Spahn Selected

Standing in third place only two points behind Wolinsky is Dartmouth's shooting ace Steve Spahn, the Ivy Player of the Week. Spahn led the Big Green to two weekend triumphs, boosting his team back into the Ivy race.

In the Columbia game on Friday Spahn bombed for 20 points as Dartmouth won, 65-54. In the big surprise win over Cornell he sank 27 points to send the Big Red to its first conference defeat.

Dartmouth's victory was not an easy one. Cornell reeled off six straight points at the outset of the game and then acted as if they could toy with the home team.

Ivy Basketball Standings

	W	L
Cornell	5	1
Yale	5	1
Penn	4	2
Princeton	3	3
Dartmouth	3	3
Harvard	3	3
Columbia	1	5
Brown	0	6

But Dartmouth quickly fought back, but the Big Red had regained a five point lead.

The Indians from Hanover doggedly remained close to the favored Cornell squad throughout the second half. With two minutes to go Dartmouth went ahead, 60-58, and then forced the Big Red into some costly errors to ice the game.

Spahn's 27 led the scoring. Bill Baugh with 21 points and Gerry Krumbein with 18 paced Cornell.

Al Kaemmerlen Leads Loop in Rebounds

On Friday the Big Red had impressively ripped Harvard, 89-69, at the loser's court. In this contest the Indians hit on 48 per cent of their shots, while at Dartmouth they could connect on but 27 per cent.

Harvard bounced back to the .500 mark Saturday night by crushing Columbia, 96-73. Gary Borchard topped the pointmaking with 22. Wolinsky lead the Columbia attack as he bucketed 18 points.

Penn put the finishing touches to a successful weekend at the Palestra by handing Brown its sixth consecutive league loss. Soph Ray Carazo's 19 points headed the balanced Quaker scoring totals, as the Red and Blue marched to a 71-57 win. Three other Penn starters broke double figures. The Bruins' Mike Cingiser took game honors with 21 points.

Boathouse Installs Home-Made Tank

Coach Dutch Schoch and the crew staff have made and installed a "poor man's" rowing tank (shown above) in the university boathouse in an effort to keep abreast of major competition.

"It's a far cry from the real thing, but it's better than nothing," Schoch said.

The tank consists of an outdoor swimming pool plastic liner placed on a masonite frame. The water in the tank does not circulate, as it does in a genuine tank.

On either side of the 20-foot diameter tank is a rowing seat similar to that in a real boat. The oar has an oval hole in it to simulate the speed of the oar in a moving boat.

Schoch said that the new tank will allow team members to practice rowing under close supervision during the winter months.

Before the tank was installed, the team could only do calisthenics and run when the lake was frozen over.

"It will be especially helpful to the freshmen," the coach commented. The coaches will be able to take inexperienced freshmen and work with them during the winter.

"The beauty of the thing is that it's portable—you can take it down and use it anywhere," Schoch said.

But the coach emphasized that the home-made tank was far from ideal. "Most other colleges have real rowing tanks."

(Continued on page seven)

Frosh Racquet Team Remains Undefeated with 5-0 Victory

The freshman squash team, now five for five, outshot Hill School, 5-0, Saturday at Pottstown before a capacity crowd.

Saturday's fifth victory for the undefeated team gave them a total match score 37 out of 39.

Frank Satterthwaite, number one man, dropped his third game, but easily defeated his younger Hill opponent with his overpowering serve which drove him into the back corners.

Pete Svastich, Williams Brown and John Fraizer, the second, third and fifth men, all were victorious in straight games.

Fourth man John Newberger only dropped his second game, while the sixth and seventh men, John Bliss and Dos Struese, were forced to make come from behind victories.

Well Balanced Team

Coach Dick Swinnerton called this team "as well a balanced team as we have ever had." He added, "The first three men are exceptional, good all around players, and they are well supported by the next four."

Satterthwaite is now the number one man. Last year, when he played for Exeter, he was rated fourth in the Prep School League. He reached the finals in the Junior Nationals held recently at Middlesex.

Satterthwaite Improved

Coach Swinnerton, commenting that Satterthwaite's game has improved, said, "He has changed his pace from a continually hard game and now plays with more variety."

During the first weeks of practice, Satterthwaite and Svastich jockeyed for first position. Coach Swinnerton still sees "little difference" between the two.

The team opened its season against Episcopal Academy, with a shut-out match of 7-0. They then went on to defeat the Naval Academy and West Point, 9-0 and 8-1. Haverford fell to the undefeated team, 6-1.

Commenting on the opposition, Coach Swinnerton said, "The Navy and Army teams were the best we've seen in years, and the first three men at Haverford were awfully good."
