McCosch Fund

Humanities Fellowships Will Promote Research

Individual scholarships in the humanities and social sciences will be offered to senior members of the Princeton faculty under Humanities Council fellowships announced by President Goheen yesterday.

A special fund, organized by President Goheen of James McCosh, Princeton's 11th president, will spend approximately $50,000 annually to permit out- standing scholars to devote them- selves to research programs of particular promise.

The scholarships will be award-
ed on a competitive basis, over and above normal departmental quotas, and Humanities Council Fellowships.

Highest University Awards: "They will be considered the highest awards that the University normally bestows, ranking above normal departmental and post-doctoral fellowships as those offered by the Council of the Humanities," President Goheen declared.

"Each McCosh Faculty Fellowship shall be equivalent to a term of leave and will, in addition, include azzually equal amount of $750 for research-related expenses. Those holding the fellowships will be subject to the policies of the University Catalogue," he added.

J. Douglas Brown '19, dean of the faculty, emphasized the importance of the new fellowship in the humanities and social sciences to balance in science and endeavor programs which have extensive government support.

TODAY

4:30 p.m. — "Buoyant Density Titrations of Polypeptides and Nucleic Acids," biochemistry seminar, Institute of Technology, 309 Frick.

5 p.m. — "Lateral Inhibition in the Eye," lecture by George von Bekesy, Harvard University, 10 McCosh.

Mayor Patterson Fulfills Basic Campaign Promise

By FRANK B. MERRICK

The nearest approach to two-block area behind the Pythhouse was killed at a recent Princeton Board of Adjustment meeting. Borough Mayor Henry S. Patterson '43 said yesterday in an interview.

The defeat of this issue represents the fulfillment of a basic promise made to borough voters by the mayor during his campaign last fall.

Before the election, he came out strongly against urban renewal, which involves a determina-
tion of blight, displacement of residents and redevelopment of the area with federal funds.

Mayor Patterson said at that time, "Urban renewal is that we are being used to change Princeton into something it isn't. I wish to point out that Princeton has grown in the past without urban renewal." He said that he is planning to go ahead with the renewal of Jackson St., within the area of the urban renewal project, but it will not be done with federal funds.

At the Planning Board meet-
ing, a motion was made to take a new vote for blight determina-
tion in the two-block area. Five members of the board, including Mayor Patterson, voted against and two voted for the measure.

Martin L. Bock, chairman of the board and a former advocate of urban renewal, was absent.

During the election, former Mayor Raymond F. Male was strongly in favor of encouraging growth in the borough. He fol-
lowed the advice of his consul-
tant, F. Dod McHugh that by 1980, 90,000 people would be de-
pendent on the borough for their economic support.

Mayor Patterson and his Re-
publican slate was strongly

against this concept. He argued in the campaign, "We must antic-
ipated growth, not encourage it."

Accordingly he has succeeded in this important point of his campaign.

He said in the interview that the Planning Board should have McHugh to reverse his revisions (made under Mayoral Male) to the overall growth plan for the bor-
ough. The consultant is only a
techician. We tell him what we want in the borough and he'll tell us how to do it," the mayor said.

"We don't want to cash in on Princeton's economic potential. We want to keep Princeton the way it is."

Washington, D.C. By EUGENE P. WIGMER, professor of physics, stands in his hometown shelter next to a cabinet containing a radiological emergency capsule. He belongs to the faculty group, which includes President Goheen, supporting shelters.

Letters Stir Conflict On Shelter Program

By JOHN W. FISCHER

The publication of two open letters to President Kennedy con-
cerning the building of fallout shelters has added fuel to the conflict over the issue.

About 129 members of the Princeton faculty and 68 members of the Rutgers faculty have published a letter endorsing Kennedy's fall-
out program in the February 11 issue of the Princeton Town Topics.

A letter opposing the program, signed by 100 faculty members, appeared in the Washington Post December 26, 1961. The letter originated at Harvard and M.I.T.

College professors all over the country have displayed an unprece-
dented interest in the issue of fallout shelters.

In commenting about the fallout issue, one Princeton professor

remarked, "This is all you ever hear in the faculty lounge."

While the debate continues, a recent poll of Princeton students indicated that many are not overly concerned about the fallout threat.

"The existence of such a shelter may mean the difference between an America that has been terrified damaged, but has enough skill, courageous people to keep it going . . . and an America that has lost so large a portion of its people, that the survivors are forced to surren-

Cape Canaveral Coverage

Alan W. Richards, photographer for the Associated Press, and Melville H. Mears, 94, Daily Princetonian reporter and a second lieutenant in the A.P.P.S. program, will cover the Mercury orbital launch of Wednesday morning at Cape Canaveral.

The pair left from Newark Airport this morning to report to the headquarters of the Na-
tional Aeronautics and Space Administration (NASA) at Cape Canaveral, Fla.

Richards will take pictures of the launching for the Air Force, while Mears will file stories for the Princetonian.

ON THE AFFIRMATIVE: Eugene P. Wigner, professor of physics, stands in his hometown shelter next to a cabinet containing a radiological emergency capsule. He belongs to the faculty group, which includes President Goheen, supporting shelters.

"We don't want to cash in on Princeton's economic potential. We want to keep Princeton the way it is."

Mayor Patterson Revisited

The Daily Princetonian endorsed Henry S. Patterson '43 in this fall's mayoralty election. Before doing so, we enumerated the principles which a candidate must promise before receiving our support.

We felt that Princeton should remain the small university town it is today, without encouraging grandiose plans for economic or residential growth.

We opposed urban renewal, with its program of blight determination, dislocation of homeowners, and use of federal funds for redevelopment.

We favored the building of increased parking facilities, but indicated that this should not be done merely as a springboard to encourage bigger business to enter the borough.

We asked for immediate action on effecting construction of the 206A bypass, to re-route the traffic flooding down Washington Road and remove this threat to the lives of university students.

Above all, we urged immediate adoption of a Master Plan which would clearly set forth the present trends and long-range future objectives for the borough. We seriously doubted the contention of the borough planning consultant, who predicted that by 1980, 99,000 people would be dependent on the borough in some way for their economic support. Any candidate for mayor who accepted this contention, with its concomitant appeal for new roads, more parking, and bigger industry, would not receive the support of the Daily Princetonian.

Mr. Patterson, as a candidate, promised to support these principles. As mayor, he has acted, in his first month, with admirable dispatch in fulfilling his campaign pledges.

Urban renewal, specifically in the Jackson St. project, more generally as a precedent for lines of future redevelopment, has been "killed." Under Patterson's guidance, the planning board voted on Feb. 2 against determination of blight in the Jackson St. area. Progress has evidently been made towards obtaining the necessary community support for the 206A bypass. Mayor Patterson has conferred with the university, borough residents, and leaders of surrounding municipalities. He seems eager to build up a "crash public relations program" which would convince the State Highway Department that many people are concerned with the proposed bypass.

Most of all, the long-range planning objectives for the borough are being significantly altered.

Consultant F. Dodd McHugh, author of the controversial "Proposed Master Plan Revisions" calling for radical growth patterns in the borough in 20 years, had been consulted by Patterson to "revise his revisions." Instead of calling for radical revamping of the street circulation layout, extensive use of urban renewal, and more liberal zoning laws to allow construction of garden apartments, McHugh will probably point out that the borough can take to prohibit unnecessary growth.

In brief review of Mayor Patterson's first month in office, we of the Princetonian commend the steps he has taken to fulfill his campaign promise to "maintain Princeton as a unique educational community." We can only hope that this atmosphere of dispatch and purposeful direction will continue.

A Ceylonese Visit

Mrs. Bandaranakulke's government provided a small Princeton audience with an entertaining evening of Ceylonese court and folk dancing Friday at McCarter Theatre. Though dancing of this sort is more appropriate to temple or village, the Ceylonese National Dance Troupe performed with unexpected assurance, and provided a higher degree of symbolic communication of ideas than was expected.

The dancers move in stilted, stylized, plastic movements, with dance as varied as the colors. Accompanied by a double ended drum, which produces a rather loud rhythmic beat that is noticeably steady in volume. There are few of the subtleties of expression that are found in Indian drumming. Bells are attached to the dancer's ankles, and provide a jangling counterpoint to the heavier sound of the drum.

Emotionally, the dance of Ceylon can have little appeal to anyone unawares of the forms and traditions which compose it. Visually, however, it is colorful and exotic, and provides for a pleasant if not exciting evening.

The Ceylonese troupe was the second of three dance ensembles to appear at McCarter this season. The next will be Merce Cunningham, who will provide a startling contrast to the Ceylonese.

Letters Solicited

The Daily Princetonian welcomes letters of a moderate length on issues of current campus, local, or national issues. All such correspondence should be signed, although the name will be withheld if desired. Because of space limitations, of course, all letters received cannot be published, and we reserve the right to edit them for the same reason.
Faculty Express Shelter Views

(Continued from page one)

"The shelters might be adequate in a minor atomic war, such as could have started in 1960. Such a war has little relevance to the type of large scale attack which might be anticipated in 1965," the letter stated.

University Shelter Program

President Goheen's advisory committee on fall-out shelters recently submitted a report to the President suggesting possible sites for shelters on campus and at Forrestal Research Center.

The committee refrained, however, from making any judgement on whether or not the university should provide shelters or from discussing any ethical issues. Commenting on the program, Dr. Wheeler stated: "This is an act of leadership. I am particularly proud that the space will not be set aside for the choice few."

Brown, Yale Letters

A similar petition protesting Kennedy's shelter program is being circulated among the members of the Brown University faculty.

Walter Kenworthy, associate professor of biology, advocated devoting more energy to arms control which he termed as our only hope.

The Brown petition is also in the form of an open letter to President Kennedy, which will be published in the Providence Journal.

Several members of the Yale faculty have published similar letters. The letter stated that the small number of people who would be saved by the shelters would not justify the many disadvantages involved.

Model U.N.

Members of the Princeton International Relations Club received an award for the "Best Delegation on the Security Council" at the University Model United Nations in Montreal last Wednesday through Saturday.

The Princeton delegation, representing the United Arab Republic, included Daniel C. Rogers '62, Jeffrey B. Morris '62 and Manuel Carvalho '63.

Over 400 delegates from 50 colleges and universities in the United States and Canada represented 102 countries in a model General Assembly, Security Council and Trusteeship.

During the four days, the delegations raised major world issues, debated them and voted on resolutions.

The model United Nations was sponsored by the four universities in Montreal, University of Montreal, Loyola, Sir George Williams and McGill.

Lebaron Heads Student Peace Union;
Donahue, Scudder Also Receive Posts

The Princeton chapter of the Student Peace Union has elected Charles W. Lebaron '65 as general chairman.

William H. Donahue '65 was chosen secretary-treasurer and Kenneth Scudder '65 was named as Princeton's special delegate to the top-level Swarthmore Peace Conference.

Lebaron has been active in SPU since the beginning of the year. He is also a member of the Fellowship of Reconciliation, another peace group. He is from New York and attended Barnard school.

Donahue is an engineer and native of Washington, D. C., where he attended Sidwell Friends School.

Scudder is a member of the Woodrow Wilson Society.

The Student Peace Union was founded two years ago by students at the University of Chicago. The Princeton chapter was started last year by R. Hunter Morey '62.

The SPU believes that war can no longer be used to settle international disputes and that the survival of the human race and continued militarism are incompatible.

This issue involves the rich commercial nucleus of the borough which is surrounded by the poorer residential areas of the township. The two areas have many overlapping facilities: two town halls, fire and police departments, school system and tax rates. However, the mayor pointed out that there are increasing areas of cooperation between the borough and township in recreation, sewer and incinerator facilities and civil defense. He favors increasing this cooperation.

Commenting on civil defense, a relatively new issue in the borough, the mayor said he is against large public expenditures for shelter construction. He feels, however, the proposed new borough school "would be foolish not to include facilities which could be converted into shelters." Capt. Sagie is coordinating all private efforts and providing the necessary information to individuals who wish to construct shelters, the mayor said.

Mayor Patterson indicated that he is interested in continuing former Mayor Male's efforts in the construction of a parking yard in the Vandeventer-Moore block, just east of the Garden Theatre. The idea is to construct an internal parking lot by building the lot on the inside of the block to do away with any "sea of blacktop."

When Mayor Male left office, there were only two landowners who would not sell or lease their property for the parking facility. Mayor Patterson commented that he is working for a mutually satisfactory agreement between the borough and the landowners.

Girl Watcher's Guide
Presented by Pall Mall Famous Cigarettes

First field trip

LESSON 7 - Keep moving

One of the most important rules of girl watching is this: keep moving. In fact, it is always a good idea not only to move, but to appear to be going somewhere. (This is especially important on group field trips.) Beautiful girls, although they enjoy being watched, are instinctively suspicious of strollers and downright fearful of loiterers.

since 1942.

On several occasions he has been voted "best lecturer" by the Senior Class. His course, "Modern America," was last semester's largest upperclass course.

A regular reviewer for both the New York Times and Herald Tribune Sunday book sections, Dr. Goldman has since 1950 also been the regular moderator for NBC-TV's intellectual discussion program, "The Open Mind."

In 1953-54 the history professor lectured under State Department auspices in most European countries west of the Iron Curtain. He was sent to India in 1956 for the same purpose.

Hess Will Lecture On Mohole Project

The intricate and intriguing "Project Mohole" will be the subject of an address to the Institute of Radio Engineers, by Harry H. Hess, chairman of the Geology Department, tomorrow evening.

The speech, scheduled for 8 p.m. in Frick Auditorium, will contain a discussion of some of the problems of drilling a 25,000 foot hole 15,000 feet below sea level.

The project is in conjunction with studies attempting to discover the composition of the earth's mantle, an object of speculation since 1850.

Study by Analogy

For years the most prevalent method of studying the mantle has been by analogy with composition of other planets, through study of their meteorites. However, uncertainties about the mantle can only be resolved by direct examination.

Another feature of Project Mohole is its proposed comparison between the earth's crust and its mantle. This is expected to pinpoint more accurately the earth's age.

scoring in the second period, tallying twice, while keeping the Tigers scoreless. Princeton began to hustle more this period but was held back by poor clearing, weak backchecking and sloppy passing.

In the third period Hyland began the Tiger rally at 3:36 with a slap shot from the left wing.

"Bloop Shot"

At 14:25 Tiger defensemen Brit Mockridge scored on a booming "bloop" shot while Hyland was partially blocking the view of Yale goalie Scott Nelson.

The Tigers continued to put the pressure on the Yale goal and at 19:17 Princeton goalie Billy Hill left the ice in order to free another man for the big push.

This move was justified 16 seconds later when Cook tied the game on a good shot from the right wing.

The sudden death overtime was short and sweet as Cook whipped the puck under Nelson's stick at 0:06 to put the Tigers back into the IVY League race.

Yale (0) — Goal: Sullivan; defense: Hubbard, Smith; forwards: Comy, Sawargo, Adams; Alternates: Donnelley, Ripley, Miles, Gunther, Hildebrand; Cook; Subs: Hills, Barker, Lloyd, Cockr, Linnom, Smith, Callaway.

Overtime — 11. Princeton, Cook (Hyland, Hersey) 0:06. Saves: Hill 0; Nelson 9; Officials: Panczak, Warburton

SOPHS—Anyone interested in exploring some of the specialized areas of IBM is invited to attend. IBM in cooperation with the U.S. Air Force, is finding some answers through research in automatic language translation systems.

Machine translation of idioms, for example, is teaching us a great deal about information processing. An idiomatic phrase may have a meaning quite different from the sum of its individual words, and a system that merely matches these words won't come close to translating it. One solution is an "expanded electronic dictionary" that contains idioms and grammatical instructions as well as single words. Work is now under way to clarify meaning further by automatic syntactical analysis.

Systems research such as this requires its own kind of translation—the translation of an idea into a working system. For people with this ability, who like to travel beyond the boundaries of their specialized areas, IBM offers unusual opportunity. If you're interested in any of the fields in which IBM is making important advances—semiconductors, microwaves, magnetics, superconductivity—and your major is in engineering or one of the sciences, you are invited to talk with the IBM representative. He will be interviewing on your campus this year. Your placement office can make an appointment. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin. Write, outlining your background and interests, to: Mgr. of Technical Employment, Dept. 98B, IBM Corporation, 950 Madison Avenue, New York 22, N. Y.

Frosh Five Win Weekend Pair

By FRANK BURGESS

If anyone doubted that Princeton’s freshman basketball team is one of the finest freshman teams in the East, the Tigers performance over the weekend dispelled these doubts.

The Bengals proved themselves with a brilliant victory over perennial power Seton Hall, 78-79, in the 11-10 victory over Bradley, 29-27. The Tigers rocketed to a win over Brooklyn, 96-78, in the 1-0 victory over Seton Hall, 31-20, and in the 9-8 victory over Brooklyn, 10-9.

Bill Bradley had 21, but more important, rocketed the Bengal defense, which has been its hallmark, to victory with 10 out of their 14 points in the overtime. Rebounds and defense are a part of Bradley’s every-game existence, and he showed no lack in these departments.

Unsung hero Dennis Roth keyed the Tiger defense. Defending against former high school All-American Richie Dec, he forced the star into many bad shots, and “held” Dec to 20 points.

Nieman had the unenviable job of battling Seton Hall’s mammoth, 6-6, 220 lb. Harry Sloan. He held the big center to 8 points, contributed 11 big points on his own.

As usual, the Bengals started slowly, and were behind 10-4 with two minutes gone. But the Tigers came back strong in the last half of the period, aided by Berling’s accurate shooting, Bradley’s rebounding and play-making, and Nieman’s key goals, which tied up the game at 4:15, and later at 1:46.

Berling’s lay-up put Princeton ahead at 1:09, and the Tigers led 97-34 at the half.

The second half was nip-and-tuck all the way. Princeton staying in the game only through the magnificent shooting of Berling.

Seton Hall tied the game at 73-79 at 2:46. Princeton frittered away the last minute and 13 seconds, working for a last shot that never materialized.

The overtime was no contest. Seton Hall hit the first basket, but then Bradley poured in three goals in a row, and the game was as good as over.

Swimming

(Continued from page eight)

The second one-two performance of the afternoon came when Princeton’s duo of Jim Griffith and Hank Gutmann beat out their Cadet opponents. Griffith recorded a time of 3:09.6.

Army fought back in the 100-yd. freestyle. Landgraf and Mike Kilroy placed first and third for the Cadets, while Cibula prevented a shutout by taking the second slot.

Graef Wins in Backstroke

Making up for his earlier loss, Graef paced Princeton to its third one-two win by turning in a clocking of 2:03.2 in the 200-yd. backstroke. Welch came in second.

Graef’s performance broke the previous pool record of 2:08.4, registered by an Ohio State teammate of Coach Bob Clotworthy several years ago.

Senior Pete Bernuth’s third place finish in the 440-yd. freestyle put the Tigers over the top, 48-31. Junley Green insured the victory by barely nailing out Cadet Steve Childers in the breaststroke.

SHADES OF CAMPBELL: Check Berling (15), in a familiar style, drives for another basket in his spectacular 33-point shooting exhibition against Seton Hall, Friday night. Bill Bradley scored 31 points.

The JOSH WHITE BLUES and SPIRITUALS

"Josh White has firmly established himself as one of the greatest folk singers of all time."

Cagers Topped by Cornell, Defeat Columbia; Track Team Excels in Two Weekend Meets

Zwirner First at Philadelphia; Bengals Overwhelm Rutgers

By RICHARD M. ASCHENBRENNER

Topped from most has Tigers quar-tered hurdles—Jim Tiger leads in his top record during his season. He went the total hurdles, of two-weekend, in the and his leads in topper wing. A standout of the 83, hurdles, Tiger 1955. Fencing mark.

NEW RECORDS

Shot put — Thompson, R. 49' 5½". (Old record: 47' 7¼")

High jump—John Hartnett, P. 6' 2½". (Old record: Huggill, P. 6' 1¼")

Two-mile relay — Princeton, 8:38.5. (Old record: Rutgers, 8:29.3.)

Two-miler Ted Johnson, and the improvement of last year's varsityolders contributed to Saturday's performance.

The next meet is Wednesday against Columbia and Pennsylvania.

(Continued on page five)

Mermen Beat Cadets, 53-42, At West Point

Lengthening their string of victories to nine, the Tiger mermen slapped Army to win Saturday's meet at West Point, 53-42.

Princeton's 400-yd. medley relay squad, comprised of captain Tom Welch, Gardiner Green, Bill Hil-lier, and Ted Johnson, started the Bengals off on the right track by breaking a short-standing pool rec-

They finished in 3:49 to eclipse the old mark of 3:50.6 set by a previous relay team earlier this season.

Upon Freestyle

Army standout Bill Londregan keeps his tables on the Tigers, as he spurred past Scottie Gratz to take the 220-yd. freestyle with a time of 23.08. The win was close until the 175-yd. mark.

In the 60-yd. freestyle, Frank Ciliberti, Colgate's No. 1 diver was able to dive the dive, enough to win first place.

The Tigers were hampered with out the services of their number two diver, Scott Andrews, who was ill.

(Continued on page five)

Jinx Ended

Sextet Downs Yale, 6-5

NEW HAVEN, Feb. 10—Bounc- ing back from a three goal deficit at the beginning of the third peri- od, the Tiger sextet evened the score with the 27 seconds remaining, and went on to upset the Elis 6-5 in sudden death overtime.

Johnny Cook's hat trick and Jimmy Hyland's two goals and three assists paced the skaters to their second Ivy League victory of the year.

A new capacity crowd at Ingalls Rink witnessed the Tigers resurrection in the third period. The Princeton sextet scored and the Bulldogs scoreless while the off- sene maintained a fast pace with plenty of shots.

Yale's Strubach Donnelly open- ed the scoring early in the first peri- od with a long slap shot from the blue line while Austin Sullivan was in the penalty box.

Hyland knotted the score a minute later on a perfectly centered pass from Cook on the right wing.

Cook put the Tigers ahead at 4:47 with a beautiful shot from an impossible angle on the right wing.

El captain Dave Crosby tied things at 2-2, shooting from a mellow in front of the Tiger cage.

Then Adams scored the final goal of the first period giving Yale a temporary one point margin.

The Bulldogs dominated the game.

MEET RECORD: Tiger timer toppper Jim Herold edges out a team- mate in Saturday's 80-yd. high hurdles event against Rutgers. The time tied the old meet record of 12.6 set at Lawrenceville last year.

(M.M. 62.4)

Title Chances Fading

By B. PETER CARY

Princeton's defending Ivy League champion lost their second straight 'league' tilt and were virtually eliminated from the race for their third consecutive Ivy title Friday night when they dropped a 45-43 decision to home-leading Cornell at Illinois.

The Tigers, who lost to Yale the week before, also by a two point margin, got back on the winning track Saturday in New York by whipping Columbia, 84-62.

The Cornell loss coupled with a weekend sweep by both the Big Red and the Elis threw Princeton three games behind these two teams which are tied for the loop lead with identical 7-3 records.

Third-place Penn leads the Tigers by one game. The Quakers dropped their game to Cornell Sat- urday and now have a 4-4 league mark. Princeton is 3-4 in league play.

Defense at Cornell

Defense told the story at Illinois, as teamwork, shot well. Big Red Soph Ray Ratkowski held league leading point marker Pete Campbell to 12 points with a fine defensive effort.

The nine-point performance was well below Campbell's average of 20 points per game. He was able, however, to break Princeton's all-time points scored record by raising his total to 1993 for three years.

With 17 more points against Col- umbia, Princeton, he raised his total to 19 points above Bud Haabastad's career record set in 1965.

Captain Al Kaemmerlen was the only Tiger regular who played im- pressively at Cornell. The 6-6 Princeton center grabbed off 18 re bounds and maintained his com- manding lead in that department.

But right, soph forward who came off scholastic probation last weekend, saw considerable action and was also impressive with strong rebounding against taller Cornell opponents.

In dropping the two-point deci- sion (Continued on page five)

WEEKEND RESULTS

Bengals Overwhelm Rutgers

By Richard M. Aschenbrenner

Blasting through nine previous time and distance barriers, Princeto- n's varsity track forces com- pleted one of the busiest and most successful weekend twin-bills in recent years.

Friday night, at the annual Philadelphia Invitational Games, the Tigers captured one first place and four seconds against the best in Eastern college and track club competition.

Saturday they toppled Rutgers, 74% 54% in a contest which estab- lished a new meet record.

Leading the Tigers in Friday night's carnival was Rod Zwirner, two-mile record holder, who fought off Fordham's Donald O'Connor to win that event. Running 2:29.2 on the slow, twelve-lap track, the junior also outlasted Manhattan's Dan Corry and John Garten of Mary- land.

Fiberglass Pole

Soph high jumper John Hart- nett equalled the winning 6-6 leap of N.Y.C.'s Bob Gardner, only to be consigned to second place on the basis of fewer misses.

Using a relatively unfamiliar fiberglass pole, junior Charlie Mitchell vaulted 14 feet, also for second place, six inches below Maryland's Tom Glass.

Both the mile and two-mile quartets captured second place in their heats, bowing to Colgate and Syracuse respectively.

Returning to the Lawrenceville boards Saturday, the Tigers con- tinued to show advanced season form as they easily subdued the Scarlet Knights.

In Top Condition

Sweeping the two-mile run and the 60-yard high hurdles, and captur- ing the first two places in the mile, 1000-yard run and high jump, the teammaned an abundance of both diversity and depth.

Using the Rutgers meet as a gauge of their performance at this time in previous years, both
